   b. Updated Use Case Model
   c. New Iteration Plan for Iteration 2
   d. Updated System Sequence Diagrams
   e. Updated Design Document
3. Demo the application – Adam Howard
4. Develop application requirements – Adam Howard

Evaluation Criteria

The application will be considered ready for a production environment if 95% of test cases pass. Acceptance testing will be done to verify how many test cases pass and how many fail. All features should be available for demonstration at the date of Iteration 2 completion. A favorable response by the audience and instructor is also required as part of the acceptable evaluation criteria.
